

The background of the entire page is a photograph of an offshore oil and gas platform. Three workers in blue jumpsuits and white hard hats are visible. They are working with a large, complex rig of ropes and pulleys. A yellow and black striped buoy is suspended from the rig. The platform has a red safety railing. The sky is overcast and the sea is visible in the distance.

# Delivering **Sustainable Solutions**

• Precision, innovation & reliability in every solution.

[www.pesco.com.ng](http://www.pesco.com.ng)

# Our Values

**Adherence to HSE Regulations:** Maintain strict compliance with all Health, Safety, and Environmental regulations to ensure a safe and sustainable work environment.

**Excellence in QA/QC:** Uphold the highest standards in Quality Assurance and Quality Control across all operations.

**Operational Efficiency:** Drive continuous improvement to

enhance operational effectiveness and business performance.

**Human Capital Development:** Invest in the growth and development of personnel and communities within our operational

**Stakeholder Value Creation:** Ensure sustainable profitability that delivers value to all stakeholders, including shareholders.

# About Us

Panumu Engineering & Supply Company Limited (PESCO) is a Nigerian-owned, fully integrated engineering services company, strategically positioned to serve the oil and gas, industry. Since our incorporation in 1994, we have consistently delivered value-driven solutions to some of the most prominent multinational oil and gas companies operating within Nigeria. With a strong focus on engineering construction, procurement, logistics support, drilling support and environmental services, PESCO is known for its operational excellence, technical competence, and unwavering commitment to quality, safety, and client satisfaction.

Over the past three decades, we have built a proven track record of successfully executing complex projects in challenging terrains. Our deep industry knowledge, compliance with global standards, and strong local content capacity have earned us recognition as a trusted and dependable partner. PESCO's strength lies in its multidisciplinary team of highly skilled engineers, project managers, technicians, and industry professionals who bring extensive experience and innovation to every project. By integrating advanced technologies, modern engineering practices, and efficient project management systems, we ensure the timely and cost-effective delivery of projects without compromising quality or safety.

We are also committed to supporting Nigeria's local content development by building strong partnerships with indigenous contractors, investing in workforce development, and contributing to sustainable industry growth. Through continuous improvement, innovation, and strategic collaboration, PESCO remains dedicated to delivering reliable solutions that enhance operational efficiency and long-term value for our clients.

# Our Mission

To become the leading integrated service provider for the Nigerian engineering industry in Sub-Sahara Africa creating value through our simple petroleum solutions.

# Our Vision

To become renowned for combining expertise, new technology, quality and sensitivity to communities and environmental issues whilst delivering within budget on all our projects.

# Services

Engineering & Construction

Offshore Logistics Support

Environmental Services

Procurement, Supply & Solar Solutions

Operations & Maintenance

Drilling Support

# Engineering & Construction

At Panumu Engineering & Supply Company Limited (PESCO), we deliver integrated engineering and construction solutions for the oil and gas industries. From concept to commissioning, our multidisciplinary team ensures innovative, fit-for-purpose results with technical integrity, cost-efficiency, and full compliance with international standards.

We execute durable infrastructure projects including roads, foundations, drainage systems, and structural works, alongside land reclamation, shoreline protection, and industrial facility development designed to perform in challenging environments while delivering long-term value and operational efficiency.

## Our Expertise

**+ Subsea Engineering** - Design and analysis of subsea production systems, pipelines, umbilicals, and associated infrastructure to ensure reliability in deepwater and shallow offshore environments.

**+ Topsides Engineering** - Structural and systems design for offshore platforms, FPSOs, and onshore facilities, integrating safety, operability, and maintainability from the outset.

**+ Process & Gas Engineering** - Development of efficient, high-performance systems for oil and gas processing, treatment, separation, and compression from conceptual studies to final execution.

**+ Front-End Engineering Design (FEED)** - Early-phase design and technical definition to establish project viability, reduce risks, and provide a strong foundation for detailed design and execution.

**+ Detailed Engineering** - Comprehensive technical documentation, drawings, material take-offs, and specifications required for procurement, fabrication, and construction.

**+ Construction Engineering Support** - Construction methodologies, sequencing, and on-site engineering support to ensure safe and efficient build-out of facilities and infrastructure.

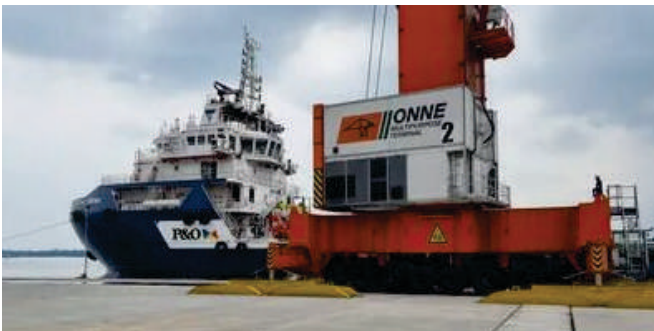

**+ Project Management** - End-to-end coordination of project activities using best-in-class tools and methodologies, ensuring projects are delivered on time, within budget, and to scope.

## Our Engineering & Construction Advantage

Our engineers and construction specialists combine deep technical expertise, extensive field experience, and advanced digital tools to ensure excellence across every stage of the project lifecycle. By leveraging industry best practices, modern technologies, and a client-focused approach, we deliver tailored solutions that optimize performance, reduce costs, and enhance safety. We are committed to innovation, collaboration, and continuous improvement driving value across engineering and construction projects in the oil, gas, and energy sectors. Our multidisciplinary team works closely with clients to transform complex challenges into practical, efficient, and sustainable solutions.

# Offshore Logistics Support

We delivers best-in-class marine and logistics support for both onshore and offshore operations across Nigeria's oil, gas, and energy sectors. Our fleet and strategic partnerships allow us to support critical logistics and marine operations safely, efficiently, and reliably even in challenging environments.

With a deep understanding of the complexities and demands of offshore operations, PESCO Logistics offers tailored solutions to meet the unique needs of each project, from exploration and drilling support to construction and production logistics, ensuring timely delivery, operational continuity, and dependable service excellence. Our commitment to safety, efficiency, and reliability enables us to support seamless offshore and onshore project execution.

### Diving Support Vessels (DSVs)

Specially designed to support subsea inspection, maintenance, and repair operations with integrated diving systems and ROV capabilities.

### Landing Crafts & Fast Personnel Carriers (FPCs)

Ideal for transporting personnel, vehicles, and equipment to and from remote locations where conventional port infrastructure is limited.

### Pipelay, Construction & Accommodation Barges

Multi-functional barges that provide a stable platform for pipeline installation, offshore construction, and crew accommodation with full onboard utilities and enhanced operational safety support for efficient offshore project execution.

### Anchor Handling Tug Supply (AHTS) Vessels:

Equipped to support rig moves, anchor deployment, towing, and offshore supply operations, our AHTS vessels are integral to deepwater and shallow-water field activities.

### Platform Support Vessels (PSVs)

Purpose-built for transporting essential supplies such as drilling fluids, fuel, water, cement, and equipment between onshore bases and offshore installations.

### Fast Support Vessels (FSVs)

High-speed craft designed for rapid transport of crew, light cargo, and urgent deliveries across offshore sites, ensuring minimal downtime in operations.

### Search & Rescue Vessels (SRVs)

Fully equipped for emergency response, medevac operations, and safety support, enhancing offshore HSE compliance and personnel security.

### Dump Barges & Ramp Barges

Versatile barges for the transportation and offloading of general cargo, diesel, freshwater, and construction materials in both coastal and inland water environments.

### Tugs & Self-Propelled Barges

Provides cost-effective towing, pushing, and transport for nearshore and inland operations.

# Environmental Services

PESCO is an emerging leader in environmental management solutions within the oil, gas, and energy sectors in Nigeria. Our Environmental Services Division delivers innovative, scalable, and regulatory-compliant solutions that support sustainable development across onshore (land and swamp) and offshore operations. Through strategic partnerships with reputable local and international firms, we address environmental challenges across exploration, production, and decommissioning phases. Our

multidisciplinary team of environmental scientists, engineers, and field specialists leverages global best practices, advanced technologies, and deep regulatory knowledge to ensure full compliance while optimizing environmental performance and safety. We are committed to responsible stewardship, risk mitigation, and sustainable project delivery helping clients operate efficiently while protecting ecosystems and creating long-term value for communities. We provide comprehensive

environmental restoration services including oil spill response, containment, remediation, and site recovery, as well as shoreline protection and mangrove restoration. Our structured, science-driven approach spans environmental assessments, remediation planning, execution, and post-project monitoring ensuring effective ecosystem recovery, biodiversity preservation, and long-term environmental sustainability.

## Our Core Environmental Services

### Site Remediation

Detection, containment, and cleanup of soil and groundwater contaminants using site-specific remedial methods.

### Ecosystem Restoration

Restoration of degraded ecosystems through re-vegetation, shoreline stabilization, and soil improvement.

### EIA & Baseline Surveys

Comprehensive surveys, sampling, and analysis aligned with FMEV, DPR, and EIA standards to support planning and ensure compliance.

### Oil Spill Response & Clean-up

Rapid oil spill response using containment and cleanup methods, with trained teams and equipment to ensure protection.

# Procurement & Supply

We offer professional procurement, material sourcing, and supply chain solutions tailored to meet the critical needs of the oil, gas, and energy sectors. Our services are designed to support the full lifecycle of your operations from sourcing to delivery ensuring you have timely access to quality equipment, components, and materials. We specialize in the procurement and distribution of a wide range of oilfield accessories, spare parts, and industrial components, including hard-to-source items, working directly with reputable Original Equipment Manufacturers (OEMs) and certified suppliers worldwide.

PESCO delivers efficient, transparent, and quality-driven procurement solutions that meet international standards and project requirements. We leverage global vendor networks to optimize cost, reduce lead times, and minimize risks. From vendor selection to logistics and delivery, we ensure seamless supply chain execution even in remote environments supported by strict quality control and inspection processes. Using advanced tracking systems, we provide real-time visibility and reliable, cost-effective supply solutions that enhance project efficiency and success.

## Solar Power System

We deliver sustainable solar energy solutions that provide reliable power and reduce environmental impact across communities and industries. Our services cover solar installation, consultation, and solar-powered systems, including street lighting and off-grid solutions for institutions and facilities. Each project is guided by proper site assessment and system design for efficiency and reliability. Using advanced solar technology, battery storage, and smart energy systems, we provide cost-effective, durable, and high-performance power solutions. We are committed to expanding clean energy access, reducing carbon emissions, and supporting sustainable development.

## What Sets Us Apart

Our procurement process is driven by efficiency, transparency, and quality assurance, ensuring that materials meet international standards and project specifications. We leverage global networks, vendor relationships, and supply chain systems to optimize lead times, reduce costs, and eliminate procurement risks. From vendor selection and technical evaluation to logistics coordination, warehousing, and delivery, PESCO ensures seamless supply chain execution even in remote environments.

Our team is committed to delivering reliable, cost-effective, and compliant procurement solutions that enhance operational efficiency and project success. We implement rigorous inspection, expediting, and quality control procedures at every stage of the procurement cycle to guarantee product integrity and on-time delivery. By integrating digital tracking systems and real-time reporting, we provide clients with full visibility and control over their supply chain activities.

# Operations & Maintenance

At Panumu Engineering & Supply Company Limited (PESCO), we provide comprehensive operations and maintenance (O&M) services for critical oil and gas production, storage, and transportation infrastructure both onshore and offshore. Our specialized O&M teams are equipped with the technical expertise, field experience, and safety culture required to operate and maintain high-value assets efficiently, ensuring maximum uptime, asset integrity, and regulatory compliance. We adopt proactive maintenance strategies and advanced monitoring systems to enhance performance and extend asset lifespan while minimizing downtime and optimizing overall operational efficiency.

We support a broad range of facilities, including:

## Gas Gathering & Gas-to-Liquids (GTL) Plants

We provide comprehensive technical support and maintenance services for gas processing facilities, ensuring efficient, safe, and fully compliant operations across the entire value chain. Our expertise spans gas compression, dehydration, sweetening, separation, and treatment, as well as conversion technologies such as Gas-to-Liquids (GTL), liquefaction, and storage systems. Our team delivers tailored solutions that optimize performance, reduce downtime, and maximize operational reliability and overall efficiency.

## Floating Production Storage and Offloading (FPSO) Vessels

Comprehensive O&M for FPSOs covering process systems, utilities, offloading, mooring, and marine operations to ensure peak performance and safety. Our experienced team ensures efficient asset management, regulatory compliance, etc.

## Crude Oil Terminals

End-to-end operations and maintenance of terminal facilities, including storage tanks, pumps, loading arms, metering systems, and export infrastructure.

## Flow Stations

Operations, monitoring, and maintenance of flow stations to ensure efficient gathering, separation, and delivery of hydrocarbons, with minimal downtime and maximum safety.

## Floating Storage and Offloading (FSO) Vessels

Maintenance and operations of FSOs to support uninterrupted crude oil storage and offloading, with an emphasis on marine systems integrity and environmental compliance. Our team ensures reliable vessel performance through proactive maintenance, safety management, and strict adherence to industry standards and continuous operational performance monitoring.

## Mobile Offshore Production Units (MOPUs)

Technical support for modular offshore facilities, including topside production systems, well testing units, and auxiliary equipment ensuring flexibility and efficient field development. Our solutions enhance operational efficiency, rapid deployment, and seamless integration with existing offshore infrastructure. This ensures reliable performance, optimized production, and cost-effective field operations throughout the project lifecycle.

# Drilling Support Services

We provide comprehensive drilling support services designed to enhance efficiency, safety, and environmental compliance across oil and gas operations. Our solutions ensure smooth and reliable drilling performance from preparation through completion. We leverage advanced technologies and skilled personnel to optimize operations and minimize downtime. Our approach is focused on delivering cost-effective solutions while maintaining the highest industry standards.

## Drilling Waste Management

We manage drilling waste through safe containment, treatment, transportation, and disposal of drill cuttings and fluids, ensuring full regulatory compliance and minimal environmental impact.

## Solids Control Services

Our solids control solutions optimize drilling fluid performance by efficiently separating solids from liquids. Using advanced equipment and techniques, we improve drilling efficiency, reduce costs, and extend fluid life.

We offer mud engineering support, drilling fluid supply, wellsite supervision, equipment rental (such as shakers, centrifuges, and mud tanks), logistics coordination, and on-site technical assistance to support seamless drilling operations. We are committed to delivering safe, efficient, and environmentally responsible drilling support solutions that enhance overall project performance.

# Health, Safety & Environment

At Panumu Engineering & Supply Company Limited (PESCO), we recognize that Health, Safety, and Environmental (HSE) considerations are not just operational requirements they are fundamental to our business success. We believe that achieving excellence in HSE is essential to realizing our corporate vision, maintaining operational integrity, and fulfilling the expectations of our clients, partners, employees, and stakeholders.

At PESCO, our approach to Health, Safety, and Environment (HSE) is proactive, systematic, and fully integrated into every aspect of our operations from planning and execution to daily activities and long-term strategy. We

are committed to protecting lives and the environment by safeguarding our workforce, contractors, host communities, and the ecosystems in which we operate. We ensure full compliance with local and international HSE laws, regulations, and best practices, while promoting a strong safety culture grounded in awareness, risk management, and accountability. Through continuous performance evaluation and improvement, we implement lessons learned and innovative solutions to enhance safety outcomes. Our ultimate goal is zero incidents, fostering a safe, sustainable, and responsible operational environment for all.

We empower our people with the training, tools, and support needed to operate responsibly in all environments, including high-risk offshore and remote onshore locations. At PESCO, HSE is a collective responsibility and a cornerstone of our identity as a trusted and responsible partner in Nigeria's oil, gas, and energy sectors.

Our commitment to Health, Safety, and Environment (HSE) goes beyond compliance it is a fundamental part of how we do business. We firmly believe that the prevention of accidents, protection of people and the environment, and the safeguarding of customer property are not just operational goals but ethical imperatives. Our operations whether onshore, offshore, or within corporate settings are guided by a deep-rooted responsibility to act legally, ethically, and with social consciousness. This approach reinforces our role as a responsible corporate citizen and a trusted partner in the energy and infrastructure sectors.

# Our Clients

## RENAISSANCE

PESCO collaborates with Renaissance to deliver reliable procurement, environmental, and drilling support services in line with industry standards.

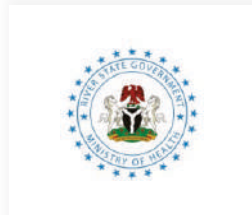

## NDDC

PESCO collaborates with Niger Delta Development Commission (NDDC) to deliver solar street lighting and procurement services for community-focused projects.

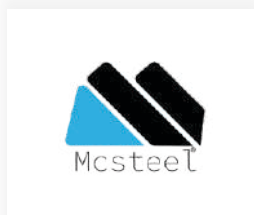

## RSG

PESCO supports Rivers with infrastructure and municipal services, including school, healthcare, and waste management.

## HYPREP

PESCO executes infrastructure development projects for Hydrocarbon Pollution Restoration Project (HYPREP) in support of community-focused initiatives.

## MCSTEEL

PESCO delivers infrastructure development projects for MCSteel in support of broader development initiatives and sustainable growth objectives.

## NOVET FORTE LTD

PESCO delivers equipment-related projects for Novet Forte Ltd in support of healthcare development initiatives and service improvement goals across critical sectors.

## SHI-MCI FZE

PESCO delivers procurement-related projects for SHI-MCI FZE in support of operational and industrial development initiatives.

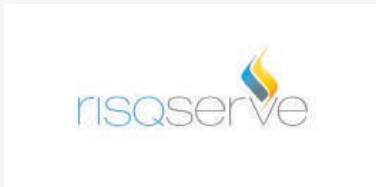

## LES ENERGY SERVICE

PESCO delivers industrial supply and support services for LES Energy in support of operational efficiency and maintenance initiatives across key sectors.

# Our Partners

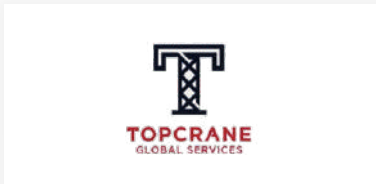

## RISQSERVE

RISQSERVE is a Nigerian oil and gas service contractor with over 10 years' experience supporting local and international companies. Provide technical project support and partner with global OEMs and engineering firms across the UK, USA, Europe, and Asia, delivering lifecycle-focused oilfield solutions.

## Cammach Engineering Nigeria Ltd

Cammach Engineering Nigeria Ltd is a practical engineering company with over 30 years' experience in offshore oil and gas sectors. They provide cost-effective solutions supported by skilled personnel and reliable delivery, while maintaining environmental responsibility. They are trusted globally for engineering services and long-term client partnerships.

## Topcrane Global Services

Topcrane Global Services Limited is a Nigerian engineering firm specializing in crane services, equipment supply, and support for construction and oil & gas projects. The company delivers reliable solutions that enhance efficiency and safe project execution across industrial sectors.
